

Actrene Addition Package

Packages with special designs are also Tailor Made for different usages. Actrene Addition Package is fabricated for injecting Actrene which is a harmful and toxic liquid. Two intermediate bulk containers (IBC) are considered for the package with UN Approval BAM 6903 for the transportation of dangerous goods. IBCs are easily detachable from the package for refilling. This could also be used for any other chemicals that is preferred to be supplied in huge amounts in IBCs instead of barrels.
