

Chemical Injection Packages

Chemical Injection Packages are widely used in Refineries, Petrochemicals and Steel Companies. Green Mile Co. as a professional manufacturer of these packages with more than 10 years' experience in design and fabrication of more than 200 Chemical Injection Packages for On-Shore and Off-Shore projects inside and outside of Iran, is the top choice of owners and clients.

Chemical Injection Packages are Tailor Made. Each Package will be designed and fabricated specifically based on the project requirements and will be customized considering the type of chemical, required flow, discharge pressure, area classification and any special requirements raised by purchaser.
