

## Refrigeration

Our specialized expertise in this area can only be acquired over years of industrial refrigeration experience. We apply this knowledge in every designing order to fabricate efficient, rugged and reliable systems for petrochemical, pharmaceutical, oil refining, natural gas processing, industrial gases, liquefied gas storage, and related markets. These high-spec refrigeration systems comply with the requirements stringent in petrochemical Plants where higher reliability and safety are required. We comply with domestic and foreign standards and Explosion proof specifications, in addition to American Petroleum Institute (API) standards and customer's proprietary specifications. We have successfully commissioned two first Iranian ammonia refrigeration packages for Shiraz third Urea and ammonia plant (318.3TR) and Razi third ammonia storage tank (1098.9TR) projects, which are now in service for more than one year with the client satisfaction

The FIRST Approved Iranian Manufacturer  
of Refrigeration Packages in **PIDMCO** AVL

The first Iranian  
manufacturer with  
live references in Iran

PROJECT	FLUID	CONTRACTOR	DELIVERY DATE	LOCATION
• Shiraz 3 <sup>rd</sup> Urea & Ammonia Plant	Ammonia	PIDEC	2014	Shiraz, Iran
• Razi 3 <sup>rd</sup> Urea & Ammonia Plant	Ammonia	HEDCO	2015	Mahshahr, Iran
